Skills

PROJECTS

Architect AI

[Link - Netlify](#)

Role: Full-Stack Developer - React.js, Gemini API, Firebase Auth

- **Problem:** Help architects and small firms get on-demand planning suggestions and design checks.
- **What I built:** Integrated Gemini API to generate architecture-specific guidance; built React UI with secure Firebase Authentication and role-based access.

Pixify Image

[Link - Netlify](#)

Role: Frontend Developer - React.js, Unsplash API, HTML5

- **Problem:** Quick image discovery and organization for designers.
- **What I built:** Developed a responsive image search app integrating Unsplash API. Enabled instant image rendering through optimized DOM manipulation.

EXPERIENCE

Frontend Developer (Freelance) – Infinite Traders Pvt. Ltd. | May 2025 – July 2025

Role: Frontend Developer - HTML5, CSS3+, React.js, SEO, SMTP/POP, Hosting

- Developed and deployed a scalable B2B steel trading web application tailored to client requirements.
- Enhanced UI/UX with React.js and responsive design, resulting in a 40% increase in traffic.
- Implemented weight calculators and dynamic product charts, increasing client engagement.
- Provided end-to-end deployment and hosting. Configured custom business email using SMTP and POP.
